

How Is Upward Spirals' Catalyst Mission Creating a Regenerative Economy?

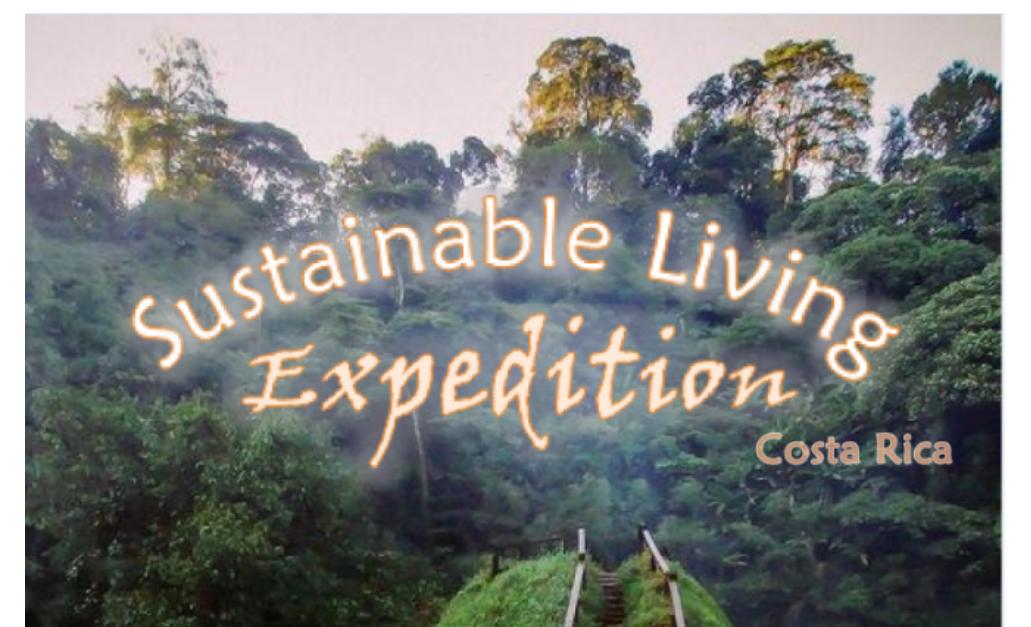

Supporting Wellness & Sustainability
Education Event Producers
UpwardSpirals.Net/plan-and-host-event-retreat

We are building tools, templates, guides, business plans, and social benefit programs for leaders of regenerative projects, to help us all accelerate the co-creation of a regenerative economy.

Management Consulting &
Organizational Development

Sustainable Living Expedition
SustainableLivingExpedition.Com

The Catalyst Mission is our solution for how to systematically empower the world's most impactful organizations with the tools, models, guides, programs and plans they need to develop regenerative local economies.

Impact Centers
(which include eco-social enterprises, wellness and education centers, intentional communities, organic food producers and distributors, environmental educators, wellness facilitators, community organizers, permaculture, conservation and ecological regeneration projects),

may be humanity's best hope for creating the new economic, education, and food systems society needs.

We are accelerating their work by providing them with an effective organizational operating system; a set of models, plans, guides and tools that includes:

Regenerative Business Models
Strategic Growth Plans
Sustainable Business Development Guides
Financial Strategies and Tools
Project Management Tools
Event Planning and Coordination Models

By integrating holistic eco-social values into powerful business systems and tools, and sharing them with the most impactful organizations,

we are catalyzing a positive feedback loop and exponential growth in all the regenerative systems needed to live in thriving collaborative communities.

By connecting projects and people to the resources, skills, and knowledge they need, we're making it easier to develop and coordinate regenerative economies,

and massively expanding the number of organizations working effectively together to create an ecologically balanced and socially harmonious economy.
